Northeast Regional Conference on Complex Systems (NERCCS 2026)

Program Booklet

Location: *Goergen Hall, University of Rochester, 275 Hutchison Rd, Rochester, NY 14620*
Dates: *March 11–13, 2026*

Day 1 (March 11, 2026)

Registration   12:00 - 4:00

Opening Remarks   1:00 - 1:30

Keynote   1:30-2:30

Sloan Auditorium

Life Exists Beyond Biochemistry: Making Abiotic (Biochemistry-free) Life in the Computer and the Test-tube
Juan Perez-Mercader (Harvard University)

Break   2:30 - 2:45

Parallel Sessions 1   2:45 - 3:45

Sloan Auditorium (Goergen 101): Network Control, Measurement, and Bias

Session Chair: Sadamori Kojaku, Binghamton University

2:45 **Distributed Self-Control of Dynamical Networks by Adaptive Link Weight Adjustments**
Hiroki Sayama (Binghamton University, SUNY)

3:05 **Estimating Uncertainty in Network Measures and Structures Arising from Noisy Data**
James Hartz (University at Buffalo, SUNY)

3:25 **A Diagnostic Framework for Sampling-Induced Distortion in Network Metrics**
Sriniwas Pandey (Binghamton University, SUNY)

Fantone Lecture Hall (Goergen 109): Adaptive Social Networks and Belief Dynamics

Session Chair: TBD

2:45 **Bridging Simple and Complex Contagions in Belief Dynamics: A Voter Model Extension**
João Franco (Vermont Complex Systems Institute, University of Vermont)

3:05 **Identifying brain network features that drive opinion formation and changes in humans**
Shweta Hatote (University at Buffalo, SUNY)

3:25 **Why We Experience Society Differently: Intrinsic Dispositions as Drivers of Ideological Complexity in Adaptive Social Networks**
Akshay Gangadhar (Binghamton University)

Break 3:45 - 4:00

Parallel Sessions 2 4:00 - 5:00

Sloan Auditorium (Goergen 101): Information, Entropy, and Behavioral Signals

Session Chair: Hiroki Sayama, Binghamton University

4:00 **On the Uniqueness of the Coupled Entropy and its Applications**
Kenric P Nelson (Photrek, Inc)

4:20 **A Network Perspective of the Stock Market Using Mutual Information and Transfer Entropy**
Shangyi Bi (Binghamton University, SUNY)

4:40 **Detecting Dynamic "Fingerprints" in Human Random Keystrokes**
Jacqueline Blake (Binghamton University, SUNY)

Fantone Lecture Hall (Goergen 109): Media, Platforms, and Field Mapping

Session Chair: TBD

4:00 **How News Connects: Mapping the Semantic Topology of a Digital Newspaper**
Sofia Sciangula (Carlo Cattaneo University LIUC)
Remote

4:20 **Tempo-Dependent Emergence in Platform-Mediated Collective Behavior**
Shaunette T. Ferguson (Barnard College, Columbia University)

4:40 **Interactive Visualization of the Updated Complex Systems Keyword Diagram**
Hiroki Sayama (Binghamton University, SUNY)

Day 2 (March 12)

Keynote   9:15-10:15

Sloan Auditorium

Optimal Networks in Urban Transport Systems
Filippo Radicchi (Indiana University)

Break   10:15 - 10:30

Parallel Sessions 3   10:30 - 11:30

Sloan Auditorium (Goergen 101): Social / Institutional Simulation and Innovation Dynamics

Session Chair: Hiroki Sayama, Binghamton University

10:30 **A Simulation Model for Historical Evolution of Geopolitical Entities**
Andrea Agosta (Carlo Cattaneo University LIUC)
Remote

10:50 **Using Agent Based Modeling to explore long-term economic impacts of nurse turnover in healthcare**
Kate J. O'Neill (Binghamton University, SUNY)
Remote

11:10 **Uncovering simultaneous breakthroughs with a robust measure of disruptiveness**
Sadamori Kojaku (Binghamton University, SUNY)

Fantone Lecture Hall (Goergen 109): Infrastructure, Risk, and Public/Health Networks

Session Chair: TBD

10:30 **Graph-Based Analysis of Hurricane Stakeholder and Warning Networks: Structural Roles, Information Flow, and Optimization Diagnostics**
Hayford Adjavor (Binghamton University, SUNY & CenterPoint Energy)
Remote

10:50 **Inaccessibility in Public Transit Networks**
Katherine Betz (University at Buffalo, SUNY)

11:10 **Network-Driven Cohort Selection and Adverse Drug Reaction Detection in Epilepsy Social Media**
Ziqi Guo (Binghamton University, SUNY)
Remote

Lunch Break   11:30 - 1:30

Lunch on your own, see website for closeby options

Parallel Sessions 4   1:30 - 2:30

Sloan Auditorium (Goergen 101): Graph Methods and Applied Dynamics

Session Chair: Georgi Yordanov Georgiev, Assumption University & Worcester Polytechnic Institute

1:30 **distanceclosure: A Python Package for Network Sparsification Based on Its Topology**
Robert Palermo (Binghamton University, SUNY)

1:50 **The Effective Graph improves prediction of network dynamics in biochemical models**
Xuan Wang (Binghamton University, SUNY & Indiana University)

2:10 **Robust Video Anomaly Detection under Partial Observation via Patch-Motion Graph Smoothing**
Neda Amirirad (Binghamton University, SUNY)

Fantone Lecture Hall (Goergen 109): Computational Models and Algorithm Diagnostics

Session Chair: TBD

1:30 **Diagnostic Evaluation of Conditional Generative Algorithms on Curated Single Cell Reference Data**
Matthew Jehrio (University of Rochester)

1:50 **Spark: Modular Spiking Neural Networks**
Mario Franco (Binghamton University, SUNY)

2:10 **Scalability of Structure-Preserving Simulations in Plasma Physics**
Sarthak Sharma (University at Buffalo, SUNY)

Break   2:30 - 2:45

Keynote   2:45 - 3:45

Sloan Auditorium

Title TBD
Adilson Motter (Northwestern University)

Break   3:45 - 4:00

Parallel Sessions 5   4:00 - 5:00

Sloan Auditorium (Goergen 101): Self-Organization, Robustness, and Epidemic Coupling

Session Chair: TBD

4:00   **A Feedback-Driven Lyapunov Principle for Self-Organization in Open Stochastic Systems**
Georgi Yordanov Georgiev (Assumption University & Worcester Polytechnic Institute)

4:20   **Canalization drives Robustness in the Evolution of Collective Intelligence under Noise**
Srikanth Iyer (Binghamton University, SUNY)

4:40   **A symbiotic SIR process**
Gerardo Palafox-Castillo (Universidad Autonoma de Nuevo Leon)
Remote

Fantone Lecture Hall (Goergen 109): Collapse, Inequality, and Sustainability Dynamics

Session Chair: TBD

4:00   **A Meta-Model of Endogenous Overcrowding-Driven Demographic Collapse**
Federico Carucci (Carlo Cattaneo University LIUC)
Remote

4:20   **Parasites become rich and drive inequality in approach to collapse in a model of evolving networks**
Atiyab Zafar (University of Delhi)

4:40   **Artificial Agents and Ecological Collapse: an LLM-enhanced Agent-Based Model of a Sustainability Game**
Francesco Bertolotti (Carlo Cattaneo University LIUC)
Remote

Day 3 (March 13)

Keynote   9:15 - 10:15

Sloan Auditorium

Complexity Across Scales of Space and time in the Brain
Krishnan Padmanabhan (University of Rochester)

Parallel Sessions 6   10:30 - 11:30

Sloan Auditorium (Goergen 101): LLM Learning, Optimization, and Alignment

Session Chair: TBD

10:30   **Prospect Learning in Large Language Models: Quantifying Risk Preferences and Adaptation Dynamics**
Nency Dhameja (Binghamton University, SUNY)
Remote

10:50 Evolutionary System-Prompt Optimization for LLM Agents in Competitive Market Simulations
Ossama Zaroual (Carlo Cattaneo University LIUC)
Remote

11:10 Cooperation or Defection? The Decay of Alignment Instructions in Complex LLM Systems
Andrea Monoli (Carlo Cattaneo University LIUC)
Remote

Fantone Lecture Hall (Goergen 109): LLM Agents in Social Systems

Session Chair: Andreas Duus Pape, Binghamton University

10:30 Large Language Model Agents Partially Reproduce Real-World Segregation Patterns in the Schelling Model
Andreas Duus Pape (Binghamton University, SUNY)

10:50 Going for the Third: Cooperation between LLM Agents in a Three-Option Setting
Leonardo Mascagni (Carlo Cattaneo University LIUC)
Remote

11:10 An Extension of the Sugarscape Model with LLM-based Agents
Luca Moroni (Carlo Cattaneo University LIUC)
Remote

Closing Remarks   11:50 - 12:00
